## TRIFOUR HEALTH

*Software solutions for Africa*

Trifour Health has grown from small beginnings to a company with a staff complement of 25 operating from our head office in Pretoria and branches in Harare, Zimbabwe and Nairobi, Kenya.

Our organisation serves about 40 hospital and clinic customers in the private, public and mining sectors on the African continent.

As we celebrate our 8<sup>th</sup> birthday, I would like to thank all our staff and customers for their support, loyalty and dedication. Last year was a tough year, but 2010 looks like a Winner.

During May we moved to a new head office premises in Charles Street, Menlo Park, Pretoria.

The new offices are located on the underground Telkom, Neotel and Vodacom optic fibre backbone cables, so our internet access should improve dramatically.

In this newsletter I would like to introduce you to our team in Zimbabwe. Trifour Health started operation in Harare in 2004 and has managed to expand by adding a hospital customer each year.

This year Thomas Nyikayaramba (second from left) was appointed branch manager to lead the team comprising Sinoteni Munjoma (right) and William Mungwiro (left).

To Thomas and his team: **Keep up the good work – the sun is rising!**

Also pictured is Andre van Biljon, Trifour Group COO, who was introduced in our April newsletter.

We welcome Avenues Clinic, the largest local private hospital in Zimbabwe, as well as the Parirenyatwa Group of Hospitals (1400-bed teaching hospital) to our circle of customers. They join existing regional customers Colin Saunders hospital and Montagu day clinic.

Please feel free to contact me at any time should you have any questions regarding our offerings and other services that can be viewed at our website.

Regards,

*Johann Odendaal*
