## TRIFOUR HEALTH

Software solutions for Africa

*A new year brings new challenges and opportunities.*

*On behalf of TriFour Health and Staff, I would like to wish you and your loved ones a prosperous, rewarding and happy 2009.*

*To our loyal customers, a big thanks for all your support over the last year, and we look forward to growing with you even bigger and better things in this new year.*

TriFour has grown to over 20 staff with a branch in Harare supporting nearly 40 customers. Our growth in Africa has also been pleasing and offers strong growth.

As part of our strategy to continuously evaluate and renew our product offerings and services, we have embarked on the following projects:

- Newsletter to improve communication with our customers, colleagues and friends,
- New website to reflect our progress and new look ([www.trifour-health.com](http://www.trifour-health.com));
- Quality assurance team ensuring quality products and updated documentation;
- Product enhancements including clinical and nursing functionality (see attachment);

### TRIMED

TriFour has been blessed in that our locally developed web-based product, TriMed has received wide acceptance in the African market.

- TriMed has now been accredited by State Information Technology Agency (SITA - Central Government's IT Partner) for use by hospitals and clinics of the Department of Health in South Africa.
- Four SA private hospitals converted to TriMed in 2008 We submit accounts electronically to medical aids and provide e-Procurement services to suppliers of pharmaceutical and other consumables.
- Lonmin Health Services – Lonmin is the 3<sup>rd</sup> largest platinum producer in the world. The contract calls for 85 TriMed users in the Andrew Saffy hospital and 5 clinics near Rustenburg. Our Wellness program catering for HIV/Aids, TB and the management of other chronic diseases went live in April and has been a great success. We interface to SAP and Radiology
- A number of hospitals in Africa have also adopted TriMed where we have developed integrated solutions for medical clusters incorporating practice management, pharmacy dispensing and stock control, billing and Electronic Patient Record (EPR).
- There are over 300 standard reports and real time dash boards via Excel.

Please feel free to contact me at any time should you have any questions regarding our offerings and other services that can be viewed at our website.

Regards,

*Johann Odendaal*
